

ZixPort™

Secure Messaging Portal

For the nation's most influential institutions, ZixCorp's Email Encryption Service is an important tool in the protection of sensitive data. Leading healthcare, financial, government and insurance organizations have turned to ZixCorp to help them meet mandatory regulatory requirements and protect customer privacy in all their email communications.

As a component of ZixCorp's Email Encryption Service, ZixPort is a secure messaging portal that allows users who don't have email encryption capabilities to securely send and receive messages. ZixPort is part of ZixCorp's Best Method of Delivery™, which automatically determines the most secure and transparent method of sending your message.

When an encrypted email is delivered via ZixPort, the user receives a notification email that links to the secure messaging portal. After logging in, the user can view their message and any attachments over a secure SSL connection. First time users go through a one-time registration process. To ensure complete privacy, all return communication is secured using ZixCorp's Best Method of Delivery.

Who uses ZixCorp's Email Encryption Service?

- Federal banking regulators (FFIEC)
- The Conference of State Bank Supervisors
- Members of the American Bankers' Association
- 30 Blue Cross Blue Shield organizations

- Automatic generation of notifications and invitations
- Custom-branded URL
- Custom notification emails
- Optional status email alerts to sender

Branding and Customization

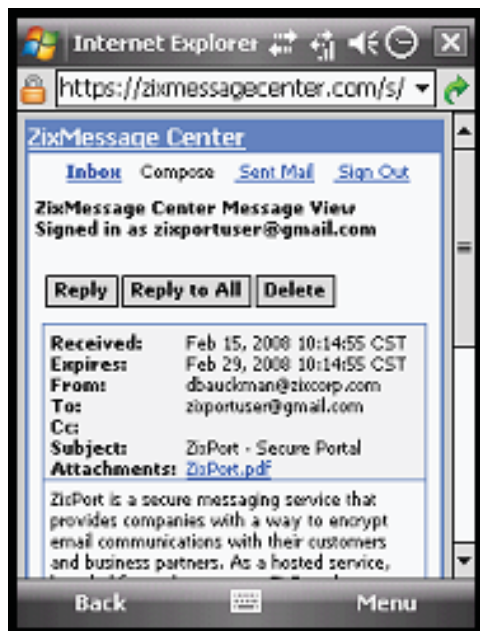

ZixPort is branded to match the look and feel of your corporate web site and configured to meet your communications needs. It lets users securely read and reply to encrypted emails you send. To allow full two-way communication with customers and business partners, ZixPort can be customized to include secure compose, reply all and forward capabilities. There is also an optional address book and you can create message expiration and password policies to meet your specific security requirements.

Composing Messages

With ZixPort, your customers can initiate an encrypted email conversation with you via your web site. You can add a "contact us" button on your site that allows them to securely contact you even if they don't have email encryption capabilities themselves. Thanks to ZixPort, transparent and secure two-way communication is guaranteed, with emails encrypted during transit.

Mobile Support

Many users choose to read their emails from Blackberry® or Windows Mobile devices. With ZixPort, you can send confidential information and be sure your customer can read and reply securely, no matter what they're using. It is designed to provide mobile users with a simple interface that can be accessed via the device's browser. There is no software to install and nothing to configure.

Reliable and Cost Effective

ZixPort is easy to set up and requires no effort to maintain. That's because ZixPort is a hosted solution, managed and maintained by ZixCorp. ZixPort resides in the ZixData Center and has 99.99% availability guaranteed to customers through our Service Level Agreements (SLAs). The ZixData Center is SysTrust certified and SAS-70 type II accredited and ZixCorp prides itself on maintaining the highest levels of performance and reliability.

ABOUT ZIXCORP

ZixCorp provides easy-to-use-and-deploy email encryption and e-prescribing services that protect, manage and deliver sensitive information to the healthcare, finance, insurance and government industries. ZixCorp's hosted Email Encryption Service enables policy-driven email security, content filtering and send-to-anyone capability. Its PocketScript e-prescribing service provides point-of-care access and transmission of patient and payor data that improves patient care, reduces costs and improves efficiency.
